

**SOUTHERN CALIFORNIA COASTAL WATER RESEARCH PROJECT**  
*A Public Agency for Environmental Research*

January 22, 2019

Dr. Clarissa Anderson  
Executive Director  
Southern California Coastal Ocean Observing System  
Scripps Institution of Oceanography  
9500 Gilman Drive, 0206  
La Jolla, CA 92093-0214

Dear Clarissa:

The Southern California Coastal Water Research Project Authority (SCCWRP) is pleased to offer this letter of support as you seek continued funding for the valuable data and services provided by the Southern California Coastal Ocean Observing System (SCCOOS).

SCCWRP is a research institute formed by 14 California water quality management agencies to develop the scientific foundation for their water-quality management. Since its founding as a public agency in 1969, SCCWRP has been a champion of sound interdisciplinary approaches to solving complex challenges in water management. In a similar capacity, SCCOOS is actively engaged in identifying needs of Southern California's water-quality management community by providing data, models and products that advance our understanding of the current and future state of our coastal and global environment. SCCWRP supports SCCOOS through my representation on the SCCOOS Board of Governors, collaborations with SCCOOS to support coastal water quality monitoring, and facilitation of communication among scientists and water-quality managers.

SCCOOS is funded primarily by the National Oceanic Atmospheric Administration (NOAA). Your sustained funding is important to maintenance of the program's observing network and to continuity of the important data products and services that these observations enable. Please let us know how we can help convey that message.

We look forward to working with you in continued partnership.

Sincerely,

Stephen B. Weisberg, Ph.D.  
Executive Director
